

SR Technics to expand its capabilities and services for Engine Piece Part Repairs

Zurich, June 30, 2010

SR Technics is expanding its Piece Part Repair business. As part of its international growth strategy the company will build up its locations in Zurich (Switzerland) and Cork (Ireland) to become leading Centers of Excellence for engine part repairs within the MRO industry.

SR Technics offers Piece Part Repair services to airline customers as well as to repair companies looking for shorter repair times for their engine parts.

In the context of this expansion SR Technics has started to make major investments in capabilities, capacities and processes to further develop and extend its existing repair capabilities. These additional services include a transfer of repair capabilities from existing to new engine types and will be provided to third-party customers as well. Ultimately, all efforts of SR Technics aim at offering more attractive repair cycle times to the customers.

SR Technics is working closely with Sanad to provide specific package deals that will include innovative leasing solutions for the material management of engines and engine Line Replaceable Units (LRUs). Customers will be able to lower their basic inventory and significantly reduce storage costs for spare parts while receiving maximum support during the entire lifecycle.

André Wall, Chief Operations Officer: "The expansion of our Piece Parts Repair activities for aircraft engines is a further milestone within the strategy of SR Technics to become a leading one-stop-shop provider within the MRO industry. Customers will benefit from shorter repair cycles, new technologies and our tailor-made service packages in managing and financing their entire engine parts."

SR Technics is an authorized CFMI and Pratt & Whitney repair station. It maintains a wide range of engine types and provides customized piece part repair solutions. Services range from single engine maintenance to integrated airline solutions with specific packages covering maintenance, management, financing and logistics services.

SR Technics is attending the Farnborough International Airshow from July 19 – 23 and welcomes visitors at stand D9, hall 4. To schedule an appointment, please contact Claudia Walter (+41-79 834 86 66).
